

IS SUPPORT UNVEILS CLOUD COMPUTING

HOUSTON BASED COMPUTER CONSULTANTS LAUNCH NEW WEBSITE

Houston – February 10, 2011 – **IS Support** announces their recent cloud computing product offering on their newly launched website. Research demonstrates that *the cloud* is part of every IT budget in 2011 and **IS Support** can help small-to-medium sized businesses achieve their goals of reducing capital expenditures by using a flexible, expandable and scalable model in the cloud.

“**IS Support** designed the Cumulus™ cloud product to do just that!” said Steve Combs, **IS Support** CEO. “Our Cumulus™ product offers business solutions ranging from *Virtual Desktop* to *Virtualized Servers* with all the required applications for *Disaster Recovery* as a one-stop-shop with one easy monthly fee,” stated Combs.

The new website is designed to showcase the new product offering for the cloud, managed services, telecom, and overall implementation services that **IS Support** has been delivering since 2002. Each service is designed to optimize a business’s assets and minimize IT downtime. **IS Support’s** solutions fit every market segment ranging from oil & gas, health care, legal, financial and other professional or manufacturing organizations.

About IS Support

Formed in 2002 and based in Houston, Texas, **IS Support** designs, builds and implements IT solutions spanning computing infrastructure, enterprise management, VoIP, and security for small-to-medium and enterprise-level clients. From design through deployment, **IS Support** is an advocate for their clients to strategically align their business and IT objectives.
